

SAN BERNARDINO FREEWAY LONG TERM RAMP CLOSURES

As part of the San Bernardino Freeway (I-10) paving project between the Golden State Freeway (I-5) and San Gabriel River Freeway (I-605), continuous long term ramp closures will begin May 4, weather permitting, on eastbound I-10 at Fremont Avenue in Alhambra and conclude at Rosemead Boulevard in El Monte summer 2010. Once eastbound ramps are complete, work will begin westbound at Temple City Boulevard in Rosemead and conclude at Fremont Avenue in Alhambra winter 2010.

Long term ramp closures are necessary due to major improvements including new pavement, electrical and drainage systems. Though more than one ramp may be closed at the same time, no two consecutive ramps will be closed. Motorists will always have the opportunity to exit just before or just after the closure. Work may require closures up to 42 days. Detours will be posted.
